## PROJECT EXPERIENCE

### **ABU Robocon Elephant and Bunny Robots — National Champion Project**

*Electrical Group Leader (UESTC Robocon Team)* *September 2022 – August 2023*

- Led the electrical subsystem: control architecture, sensing topology, and real-time communication design.
- Architected a distributed real-time control network across controller, motor drivers, and sensing nodes.
- Built a high-rate state-estimation pipeline fusing inertial and encoder data for closed-loop feedback.
- Developed a field-oriented actuation stack with cascaded torque, velocity, and position loops.
- Drove full-system integration, hardware-in-the-loop validation, and operator interface design.
